

Ideas Concerning the Historical Identity and the Connections of the City of Phaselis an Eastern Mediterranean Port*

Bir Doğu Akdeniz Limanı Olarak Phaselis Kentinin Tarihsel Kimliği ve Bağlantıları Hakkında Düşünceler

Nihal TÜNER ÖNEN**

Abstract: This article is based upon ancient sources and numismatic and epigraphic evidence and evaluates the historical identity of Phaselis, located on the border of Lycia-Pamphylia, within the framework of its relations with eastern Mediterranean ports. Phaselis and settlements such as: Gagai, Corydalla and Rhodiapolis had a Hellenic identity in early times and this is compatible with Rhodes' attempts especially in the VII c. to found new colonies in Lycia and Cilicia, reflecting its desire to participate in the ongoing commercial activities in the eastern Mediterranean. When the temporal context of this dominance is investigated, *antroponymic* data interestingly reveals that Phaselis retained its Hellenic characters until the Roman Period, while other Rhodian colonies on the east Lycian coast lost many elements of their Hellenic identity in the V and IV centuries B.C. The second section deals with the inferences drawn concerning the historical identity of the city in the perspective of its connections within the eastern Mediterranean. This section examines the commercial aspects of this relationship in particular through presenting the spread of Archaic Period coins struck by Phaselis in eastern Mediterranean cities such as: Damanhur, Benha el Asl, Zagazig, in Syria, in the Anti-Lebanon and in Jordan. Thus, through extending the observations of these commercial links within the context of *emporion* the city possessed in the Classical and Hellenistic Periods, data concerning the network of regional and inter-regional relations formed by Phaselis in the eastern Mediterranean are examined in detail.

Keywords: Phaselis, East Mediterranean, ancient port, identity, trade, *antroponymi*.

Özet: Buradaki makale, antik kaynaklar, numizmatik ve epigrafik belgeler ışığında Lykia - Pamphylia sınırında yer alan Phaselis kentinin tarihsel kimliğini Doğu Akdeniz limanlarıyla kurduğu ilişkiler çerçevesinde değerlendirmektedir. Halihazırdaki veriler başta Phaselis olmak üzere, Gagai, Korydalla, Rhodiapolis gibi yerleşimlerin erken dönemlerde Hellen kimliği taşıdığını göstermektedir. Bu olgu, Rhodos'un özellikle VII. yüzyılla birlikte, Doğu Akdeniz'de devam eden ticari faaliyetlerin bir parçası olmak isteğini yansıtan Lykia ve Kilikia'da yeni koloniler kurma çabalarıyla uyumlu görülmektedir. Doğu Lykia kentlerinde İÖ. V-IV yüzyıllarda Hellen kimliğinin pek çok unsuru ile yitirildiği gözlenirken, Phaselis'in Hellenik karakterini Roma Dönemi'ne kadar muhafaza ettiği *antroponymic* verilerle belgelenmektedir. Kentin tarihsel kimliği üzerine ulaşılan sonuçlar, ikinci bölümde Doğu Akdeniz ile kurduğu bağlantılar perspektifinde ele alınmıştır. Burada özellikle, Phaselis darphı Arkaik Dönem sikkelerinin Damanhur, Benha el Asl, Asyut, Zagazig, Suriye, Antilibanon ve Ürdün gibi Doğu Akdeniz kentlerindeki yayılım alanı sunularak bu ilişkinin ticari boyutu irdelenmiştir. Nitekim bu ticari bağlantılara ilişkin gözlemler, kentın Klasik ve Hellenistik Dönemlerde sahip olduğu *emporion* bağlamında genişletilerek Phaselis'in Doğu Akdeniz'de kurduğu bölgesel ve bölgeler arası ilişkiler ağı hakkındaki veriler ayrıntılı bir biçimde analiz edilmiştir.

Anahtar Sözcükler: Phaselis, Doğu Akdeniz, antik liman, kimlik, ticaret, *antroponymi*.

* A paper on this subject was given at the *SOMA* symposium, Florence, 1-3 March 2012, which is here expanded upon.

** Yrd. Doç. Dr., Akdeniz Üniversitesi, Eskiçağ Dilleri ve Kültürleri Bölümü, Antalya, nihaltuner@akdeniz.edu.tr

The ancient city of Phaselis is on the southern coast of Asia Minor on the border between Lycia-Pamphylia. There are two arguments concerning whether Phaselis was founded by the Mycenaean in the XIV- XIII century B.C. or was established during the Second Colonisation Period (750-550 B.C.) by the Rhodians. The reason for this discussion is the disagreement in the sources providing information about the foundation of the city. Each foundation myth says that Phaselis was founded by someone called Lakios. The confusion arises from the statements made concerning the identity of Lakios. While according to some sources Lakios was from Lindos or from Argos, other sources report that he was one of the colonists who came with Mopsos when Mopsos began the colonization movement after the Trojan War (Ael. Herod. *Pros. Cath.* III 1, 253; Steph. Byz. *Eth.* s.v. Γέλα; Athen. *Deip.* VII. 51; Blumenthal, 1963, 129; Erzen, 1973, 394 pp.; Leschhorn, 1984, 28, 43, 384; Scheer, 1993, 182-187). However, independent of the native Phaselis tradition we usually come across Mopsos in Pamphylia (For Perge: Şahin, 1999, 135-140, nr. 101-107; for Aspendos: Kallimakhos I. 198; Robert, 1960, 177; for Sillyon: Hereward, 1958, 57, nr. 1; Robert, 1960, 177 fn. 5; Selge: Strab. XII. 7. 3; see also Nollé, & Schindler, 1991, T1, no 31). Pamphylian cities, through relating their foundations to a Greek hero, desired through this to obtain certain privileges. In this case, since the foundation of the city of Gella, which was colonized by Lakios' brother Antiphemos, was certainly dated to the VII century B.C., Phaselis was established during the Second Colonization Period by the Rhodians. Supporting this conclusion is the analysis of the epigraphic documents uncovered in Phaselis and on Rhodes, and also the fact that during the excavations conducted in Pamphylia and Lycia to date, no evidence has been discovered to suggest the existence of any Mycenaean settlement.

From the Iron Age onwards the Mediterranean world embarked upon a new financial and economic course. In the period between the VIII and the VI centuries B.C. many cities in Hellas, on the islands and in Western Anatolia founded their own colonies, and Rhodes, especially in the VII century founded colonies in Lycia and Cilicia. Apart from her interests in Lycia, which dated back to as early as the Trojan War, the reason why Rhodes established colonies at the entrance to Pamphylia and in Cilicia was to enable her to participate directly in the commercial activities taking place across the eastern Mediterranean and Egypt. The Rhodians founded Phaselis to serve this purpose on the Lycia-Pamphylia border, on an isthmus possessing three natural harbours. According to the ancient sources during the Second Colonization Period the Rhodian colonists colonized the cities of Gagai (*Etymologicium Magnum* 219.6-11), Melanippion (Adak, 2007a, 42, 2007b, 275), Corydalla (*FGrHist* Ia, 1 frg. 246; Steph. Byz. 376) and Rhodiapolis (*FGrHist* 2b 115, F 103. 15) on the Lycian coast in addition to Phaselis, and, on the Cilician coast, Tarsus (Strab. XIV. 5.12) and Soloi (Strab. XIV. 5. 8). But the Rhodian effect documented for the earlier periods in eastern Lycia was gradually replaced by the Lycians in the V and IV centuries B.C. The inscriptions in Lycian unearthed in the area (Rhodiapolis: *TAM* I 149-150; Corydalla: Neumann, 1979, 14 nr. 302; Asartaş: Tekoğlu, 2002-2003, 107) and the Lycian-type rock tombs show that these cities were under the political control of Lycia (Adak, 2007a, 43). This is clearly evident for the cities of Gagai and Rhodiapolis. *Wedrēi*, which is found on coins from Rhodiapolis and which means "city" is thought to have been the name of Rhodiapolis in the Classical Period (Keen, 1998, 203; Kolb, & Tietz, 2001, 392). A coin dated to between 430-420 B.C. carries the name in Lycian characters *Gaxe* referring to Gagai and the coin bears a Lycian legend (Carruba, & Vismara, 2002, 75-88). Based upon this evidence it could be said that these two cities left their Greek origins, adopted Lycian traditions and changed their names. Additionally, recent studies conducted in eastern Lycia have shown that during the Classical Period Lycian rule extended towards the east much further than was previously thought. As was proved from archeological evidence and epigraphic documents, Phaselis succeeded in preserving its Greek character until the Roman Period. Phaselis' geographical location, its separation from Lycia by mountains and its access to the sea, also

out of the eastern Mediterranean. In the records termed the Ahiqar Parchment the products imported to Egypt in the V century B. C. included, in particular: metals, processed wood (panels, plates, etc.), wine, fragrant oils and wool (Briant, & Descat, 1998, 69-72; Bresson, 2000, 68-73). Among the products mentioned, particularly the wood and fragrant oils were among the exported goods from Phaselis. Plinius (*Nat. Hist.* XXI. 24-25) writes that the red lilies of Phaselis are the second most favoured lilies of the ancient world after Laodiceian lilies in Antiocheia and Syria. These lilies must have been used in the production of perfume and medicine. Apart from these lilies, Phaselis' roses were also renowned. Athenaios (*Deip.* XV. 38) says that the rose oil made from the roses of Phaselis is really fine. Plinius (*Nat. Hist.* XIII. 5) notes that Phaselis rose oil is very fashionable and its reputation extends as far as *Neapolis*, *Capua* and *Praeneste*. Such a wide expansion of rose cultivation and the information provided by Athenaios and Plinius suggests that rose cultivation in Phaselis was of real importance and those roses were turned into a commercial export product after being processed in Phaselis. The trees on Tahtali Mountain rising just behind the city and above all the cedars which were preferred in ship building certainly were important as commercial products. As the Ahiqar Parchment customs records clearly indicate, wood and the materials for ship building brought from the city territory were exported to Egypt through the harbour at Phaselis.

A votive inscription discovered in the city, dated to the V. century B.C. and dedicated by two seamen from Phaselis, *Nikandros, the son of Nikion and Polykarters, the son of Polyainetos* records that one tenth of the profits gained from their sea trade were dedicated to Athena Polias and it is the earliest epigraphic document which provides information concerning the maritime trade of the city (*TAM* II 1184). A text (*IG* I³ 10) of a treaty that is dated to the middle of the V century B.C., containing the regulations regarding the problems that the merchants from Phaselis experienced in Athens shows that the privileges granted to Athens' most important and special ally, Chios, were also granted to the merchants from Phaselis. With the Peace of Callias, Phaselis' significance as a harbour city in the Mediterranean was crystallized. According to this peace no Persian ship was to sail between Cyaneai and Phaselis, they couldn't sail between the exit of the Bosphorus in the Black Sea to the north and the Mediterranean to the South (Isok. *Panegy.* 117; *Areopag.* 80; *Panath.* 59; *Lyk.* 73; *Diod. Bibl.* XII. 4. 5; *Suda, Lex.* s.v. Κίμων). Here Phaselis was particularly mentioned as the most eastern trade point of Athens.

Towards the end of the V century B.C. Peloponnesian pirates increased their attacks in the Aegean and the Mediterranean Sea. Faced with trouble which brought the city's grain imports to a standstill, Athens despatched six ships under the command of Melesandros (*Thuk.* II. 69). This fleet was sent to inspect the Lycia and Caria regions and to ensure the security of the trade ships from Phaselis and the Phoenician trade ships (Phoenicia/Olympos or Porto Genoa harbour). These ships were to protect the trade ships from Phaselis and especially those ships transporting grain to Athens. Demosthenes (*Cont. Lac.* XXXV. 1, 10, 52), one of the most prominent orators of the IV century B.C. said the people of Phaselis are the most fraudulent and the most deceitful merchants in the world. Again it is interesting to find the names on III century B.C. civic coins relating to shipping such as: Nausikles, Nausikrates and Nausinikos (Heipp-Tamer, 1993, series 8a; nr. 88, 89, 155).

The role played by Phaselis in Mediterranean trade seems to have increased especially during the Hellenistic Period. After the conquest of Phaselis and Lycia by Ptolemaios I in 309 B.C. the region stayed, with some intervals, under the dynasty of Ptolemaios for nearly 100 years. Diodorus (*Bibl.* XX. 27. 1) says that when Ptolemaios learnt that his commanders had lost their cities in Cilicia, he sailed towards Phaselis and he captured the city and the Ptolemaios dynasty must always have tried to keep this very important trade city under their rule. Because of this great Ptolemaian interest in the city, Phaselis struck their silver coins during this period

participation again in the Lycian League in 46 B.C. the city almost completely lost this prominence.
