

# Ranking of scientists in Turkish Institutions according to their Google Scholar Citations profiles

## Fifth edition

This edition was built with data collected during the **first week of October 2015** for researchers working in **Turkish** (Turkey, Europe/Asia) institutions. It is a **BETA** Ranking of their declared (voluntarily) presence in the **Google Scholar Citations** database. We are asking researchers appearing in future editions to sign into these databases, correcting and updating their public profiles.

There are still **MANY gaps** in the list, so please contact us ([isidro.aguillo@csic.es](mailto:isidro.aguillo@csic.es)) for errors for solving them promptly. You need to have a public profile like this:

<http://scholar.google.com/citations?user=SaCSbeoAAAAJ&hl=en>

The list consists of the **Top 5000 profiles** (including former PhD students and non-papers in the past with this affiliation) ranked first by h-index in decreasing order and, when equal, by the number of citations as a secondary criteria.

More lists:

| World                                             |                                                                              |                                            |                                       |

### Google Scholar Citations Profiles

GS is a **free** very large bibliographic database that it is especially useful for bibliometric number (and lists them) of citations received by the items included. Its current size is over 1 many of them with links to openly available full-text versions). This is almost three times paywalled competitors like WoS/Thomson or Scopus/Elsevier.

**GS Citations** is a tool for setting up author profiles of individuals and their publications. There are many advantages in generating your own profile using GSC. It is really very easy to use your account to start collecting your publications and the associated metrics. The system is very easy to use every step offering candidate publications (with a very low error rate) and the possibility of deleting records.

### How to set up your own profile (and few advices and warnings)

There are several presentations with easy instructions that can help you in the process of setting up your collections in English and Spanish:

- \* [How to set up your Google Scholar profile in Google Scholar Citations \(Sarah Good\)](#)
- \* [Como crear perfil de investigador en Google Scholar Citations \(Julio Alonso Arévalo\)](#)

Please, follow the following advices and take into account the warnings about nasty problems:

- The profile should be **'public'**. Otherwise nobody could access to your information.
- If you have several email addresses for accessing your Google account, probably you will have several Google Scholar Citations profiles. Please, delete duplicate old profiles as it is very complex to maintain by yourself.
- **Entries marked # means there are other profiles for the same author**
- If your name is common the best advice is to disable the automatic updating. The system will add a lot of papers that are signed by other scientists with a similar name.
- **It is important to delete all the entries not being authored by you, as the profile will be cleaned**
- Contact with your colleagues or co-authors if you discover they are not maintained properly.

**Isidro F. Aguillo** FULL NAME, FAMILY NAME LAST

Verified email at csic.es - Homepage  
KEYWORDS IN ENGLISH  
INSTITUTIONAL EMAIL DOMAIN

- Identify yourself with your standard signature name (not inverse)
- Add the [ORCID identifier](#), with the following syntax without blank spaces (ORCID:0000-0001-8927-4873)
- Provide information about your affiliation, including **institution name and country**
- Use an **institutional email account**
- Use **keywords in English** (about 5) for allowing comparisons with international colleagues
- Preferably, neither general terms (physics, chemistry, medicine) nor very specific ones

### Information about the updates

The rankings are updated without a fixed frequency. When the number of new profile important mistake is discovered, then the data for the **full list of the country scientists** Scholar database is updated daily and many profiles can change abruptly in a few days it is (for comparison purposes) to refresh individual accounts. Please, take into account that many profiles and even a large increase in your citations or h-index personal count could change the list when comparing with others with a faster growing rate!.

This ranking has been funded by the **Project ACUMEN**,  
European Commission 7th Framework Programme, Capacities, Science in Society 2010  
and the CSIC Intramural 201310E040
